PROFESSIONAL SUMMARY

Artificial Intelligence & Data Science undergraduate with hands-on experience in machine learning, data analysis, and full-stack development. Proven ability to build end-to-end ML-driven applications and lead teams in hackathon environments, including a Top 6 finalist finish. Actively seeking internship and placement opportunities to apply ML and software engineering skills in real-world, scalable systems.

EDUCATION

Bachelor of Technology in Artificial Intelligence & Data Science (*Expected: July 2027*)

Sri Krishna College of Technology | Coimbatore | CGPA: 8.89

Higher Secondary Education in Mathematics and CS (*Completed: Apr 2023*)

PSGR Krishnammal Girls Higher Secondary School | Coimbatore | Percentage: 94.5%

SKILLS

- Programming & Development:** Java, Python, HTML, CSS, JavaScript, React.js, Spring Boot
- Machine Learning & Data Science:** Scikit-learn, Pandas, NumPy, Exploratory Data Analysis (EDA), Feature Engineering
- Databases:** MySQL, SQL
- Tools & Platforms:** Git, GitHub, AWS (Foundational), Docker (Learning), VS Code, Figma
- Core Computer Science:** DSA, Object-Oriented Programming, Operating Systems, Computer Networks, DBMS
- Languages:** Tamil (Native), English (Fluent), Hindi (Beginner), Japanese (Beginner)

EXPERIENCE

Full Stack Developer Intern | *M8 IT Solutions Pvt Ltd* | Coimbatore | Apr 2025 – May 2025

- Developed PlateStream, a recipe-sharing web app using Spring Boot, React.js, and MySQL.
- Implemented core user features and multimedia modules to enhance engagement.
- Delivered an end-to-end product within internship timelines through collaborative development.

Java Developer Intern | *OctaNet Services Pvt Ltd* | Remote | Jan 2025 – Feb 2025

- Built an ATM simulation system in Java with modular OOP design.
- Implemented core banking functionalities: authentication, balance inquiry, and transactions.

PROJECTS

Maatram DeseIQ – ML-Based Full Stack Application | Python, Machine Learning | *Hackforge 2.0* | Top 6 Finalist (Team Project)

- Led a team to build an ML-driven system predicting student dropout risk and deservingness.
- Implemented data preprocessing, feature engineering, and supported model evaluation.
- Assisted with backend–frontend integration and presented the solution to judges.

AI Resume Analyzer | Python, Machine Learning

- Built an ML-based application to analyze resumes against job requirements.
- Applied text preprocessing and feature extraction techniques.

Twitter Sentiment Analysis | Python, NLP (*Ongoing*)

- Developing an NLP pipeline to classify sentiment from Twitter data.

Mobile Recharge Management System | React.js, Spring Boot, MySQL

- Developed a full-stack academic application to manage secure mobile recharge workflows.

CERTIFICATIONS & ACHIEVEMENTS

- Hackforge 2.0 – Top 6 Finalist:** Selected among the top 6 teams out of 200+ for developing an ML-based full-stack dropout prediction and prevention system.
- National-Level Hackathon – Finalist (40-Hour Event, Upcoming):** Selected among top teams in a high-intensity, competitive hackathon.
- SMART India Hackathon (SIH) 2024 & 2025 – Participant:** Contributed to innovative solutions addressing real-world technical challenges.
- Department Rank 3 – Academic Excellence:** Consistently demonstrated strong academic performance and technical proficiency.
- LeetCode Challenges – 200+ Problems Solved (Java / C++):** Built strong algorithmic and coding skills through consistent practice.
